Journal of Photochemistry and Photobiology A: Chemistry 111 (1997) 275–278

Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY A:CHEMISTRY

Subject Index of Volume 111

Absorbance
photochemical conversion of sanguinarine to oxysanguinarine, 51
Absorption spectrum
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
Acetone degradation
enhanced photocatalytic activity of $Ti_{1-x}V_xO_2$ solid solution on the degradation of acetone, 199
Acetylarenes
photo-induced dehalogenation of α-bromoacetylarenes, 27
Acid–base
ground and excited states acid–base properties of acridine-1,8-dione dyes, 163
Acridinedione
ground and excited states acid–base properties of acridine-1,8-dione dyes, 163
Albumin
control of the thermal reaction of a photochromic spirobenzopyran by the enzyme-like activity of albumins, 145
Aqueous suspensions
actinometric and spectrophotometric study of the light interaction with aqueous suspensions of various solids, 181
Atomic rubidium
bromine atom-abstraction reactions at elevated temperatures by ground state atomic rubidium, $Rb(5^2S_{1/2})$, investigated by time-resolved laser induced fluorescence ($Rb(5^2P_{3/2}–5^2S_{1/2})$; $\lambda = 780$ nm), 1

Benzophenone
quenching of triplet benzophenone by methyl and methoxy benzenes: are triplet exciplexes involved?, 41
Bimolecular processes
study of bimolecular processes in ternary cyclodextrin complexes in the solid state by diffuse reflectance laser flash photolysis, 241
Bromin atom-abstraction
bromine atom-abstraction reactions at elevated temperatures by ground state atomic rubidium, $Rb(5^2S_{1/2})$, investigated by time-resolved laser induced fluorescence ($Rb(5^2P_{3/2}–5^2S_{1/2})$; $\lambda = 780$ nm), 1
6-Bromo-2-naphthol
room temperature phosphorescence of 6-bromo-2-naphthol adsorbed on latex substrates, 249

Cadmium sulfide
photochemistry of ZnTPP induced by cadmium sulfide nanoparticles in 2-propanol, 187
Cadmium sulphide/SiO_2/2,5-dihydrofuran
photoreduction of carbon dioxide catalysed by free and supported zinc and cadmium sulphide powders, 223
Carbidopa
deceleration of light-induced changes of selected pharmacons by means of light screening films, 171
Carbon dioxide
photoreduction of carbon dioxide catalysed by free and supported zinc and cadmium sulphide powders, 223

Elsevier Science S.A.

Cationic
photochemistry and photoinitiator properties of novel 1-chloro-substituted thioxanthones. III: Preliminary study of the photoacid generation, 229
Chemical actinometry
actinometric and spectrophotometric study of the light interaction with aqueous suspensions of various solids, 181
4-Chloroacetanilide
transformation of monuron photosensitized by soil extracted humic substances: energy or hydrogen transfer mechanism?, 265
Chromotropic property
studies on the interaction of bacterial lipopolysaccharide with cationic dyes by absorbance and fluorescence spectroscopy, 157
CIDNP
the mechanism of oxidation of NADH analogues. 4. Photooxidation of *N*-acetyl-substituted 1,4-dihydropyridine in the presence of quinones, 61
Coupled flow reactors
chemical(photo-activated) coupled biological homogeneous degradation of *p*-nitro-*o*-toluene-sulfonic acid in a flow reactor, 253
Cr-cyclam
flash photolysis studies of the *trans*-[Cr-cyclam$(CN)_2$]ClO_4 (cyclam = 1,4,7,11-tetraaza-cyclotetradecane) complex. Part 1. Elucidation of its luminescence lifetime's special solvent dependence; its luminescence spectra in several solvents, 23

Deacetylation
the mechanism of oxidation of NADH analogues. 4. Photooxidation of *N*-acetyl-substituted 1,4-dihydropyridine in the presence of quinones, 61
Debromination
photo-induced dehalogenation of α-bromoacetylarenes, 27
Di-π-methane rearrangement
kinetic study on photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4*H*-thiopyrans, 15
photochemical di-π-methane rearrangement of quinoxalinobarrelenes, 57
Diazo-phosphonium salts
synthesis and photochemical properties of aromatic diazo-phosphonium salts, 47
N,*N*-Dibutyl-1,4,5,8-naphthalenediimide
photophysical characterization of a 1,4,5,8-naphthalenediimide derivative, 97
Diffuse reflectance
actinometric and spectrophotometric study of the light interaction with aqueous suspensions of various solids, 181
Diffuse reflectance laser flash photolysis
study of bimolecular processes in ternary cyclodextrin complexes in the solid state by diffuse reflectance laser flash photolysis, 241
1,4-Dihydropyridine
the mechanism of oxidation of NADH analogues. 4. Photooxidation of *N*-acetyl-substituted 1,4-dihydropyridine in the presence of quinones, 61

DNA
in vitro photochemical damage to DNA, RNA and their bases by an inorganic sunscreen agent on exposure to UVA and UVB radiation, 205
Dye-polymer interaction
studies on the interaction of bacterial lipopolysaccharide with cationic dyes by absorbance and fluorescence spectroscopy, 157

Electron spin resonance
UV–visible and electron spin resonance study of mercapto-substituted hypocrellin B: photogeneration of semiquinone radical anion and superoxide, 105
Electron-transfer
theory of electron transfer reactions in photosynthetic bacteria reaction centers, 111
Electrostatic crosslinking
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
Enzyme-like activity
control of the thermal reaction of a photochromic spirobenzopyran by the enzyme-like activity of albumins, 145
Excited state
ground and excited states acid–base properties of acridine-1,8-dione dyes, 163
Excited-state electron transfer
ion-pairing control of excited-state electron-transfer reactionsEffect of cations on cationic reactants, 9

Fenton systems
chemical(photo-activated) coupled biological homogeneous degradation of *p*-nitro-*o*-toluene-sulfonic acid in a flow reactor, 253
Fenuron
transformation of monuron photosensitized by soil extracted humic substances: energy or hydrogen transfer mechanism?, 265
Flavanone
a comparison of the photochemistry of flavanone with that of flavone originating from their lowest excited triplet states in ethanol, 35
Flavone
a comparison of the photochemistry of flavanone with that of flavone originating from their lowest excited triplet states in ethanol, 35
Fluorescence
photochemical conversion of sanguinarine to oxysanguinarine, 51
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
Fluorescence lifetimes
photophysical characterization of *trans*-4,4′-disubstituted stilbenes, 87
Fluorescence quantum yields
photophysical characterization of *trans*-4,4′-disubstituted stilbenes, 87
Fluorescence quenching
studies on the interaction of bacterial lipopolysaccharide with cationic dyes by absorbance and fluorescence spectroscopy, 157
Fulvic acid
transformation of monuron photosensitized by soil extracted humic substances: energy or hydrogen transfer mechanism?, 265

Ground state
ground and excited states acid–base properties of acridine-1,8-dione dyes, 163

High dispersity titanium dioxide
deceleration of light-induced changes of selected pharmacons by means of light screening films, 171
Humic acid
transformation of monuron photosensitized by soil extracted humic substances: energy or hydrogen transfer mechanism?, 265

Hydroperoxidation
photochemical hydroperoxidation of terpenes. I. Synthesis and characterization of α-pinene, β-pinene and limonene hydroperoxides, 75
5α- and 6α/6β-Hydroperoxides
rates and mechanism of light-dependent degradation of sterols in senescent cells of phytoplankton, 139

Inhibitors
control of the thermal reaction of a photochromic spirobenzopyran by the enzyme-like activity of albumins, 145
Intersecting-state model
theory of electron transfer reactions in photosynthetic bacteria reaction centers, 111
Intramolecular interaction
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
In vitro photochemical damage
in vitro photochemical damage to DNA, RNA and their bases by an inorganic sunscreen agent on exposure to UVA and UVB radiation, 205
Ion-pairing
ion-pairing control of excited-state electron-transfer reactionsEffect of cations on cationic reactants, 9
Isoelectric point
enhanced photocatalytic activity of $Ti_{1-x}V_xO_2$ solid solution on the degradation of acetone, 199

Kamlet–Taft equation
flash photolysis studies of the *trans*-[Cr-cyclam$(CN)_2$]ClO_4 (cyclam = 1,4,7,11-tetraaza-cyclotetradecane) complex. Part 1. Elucidation of its luminescence lifetime's special solvent dependence; its luminescence spectra in several solvents, 23
Ketyl radical
a comparison of the photochemistry of flavanone with that of flavone originating from their lowest excited triplet states in ethanol, 35
Kinetics
bromine atom-abstraction reactions at elevated temperatures by ground state atomic rubidium, Rb($5^2S_{1/2}$), investigated by time-resolved laser induced fluorescence (Rb($5^2P_{3/2}$–$5^2S_{1/2}$); $\lambda = 780$ nm), 1
Kinetic study
kinetic study on photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4*H*-thiopyrans, 15

Laser-induced fluorescence
bromine atom-abstraction reactions at elevated temperatures by ground state atomic rubidium, Rb($5^2S_{1/2}$), investigated by time-resolved laser induced fluorescence (Rb($5^2P_{3/2}$–$5^2S_{1/2}$); $\lambda = 780$ nm), 1
Light scattering
actinometric and spectrophotometric study of the light interaction with aqueous suspensions of various solids, 181
Light screening plastic film
deceleration of light-induced changes of selected pharmacons by means of light screening films, 171
Light sensitive pharmacons
deceleration of light-induced changes of selected pharmacons by means of light screening films, 171
Light stabilisation
deceleration of light-induced changes of selected pharmacons by means of light screening films, 171
Luminescence lifetime
flash photolysis studies of the *trans*-[Cr-cyclam$(CN)_2$]ClO_4 (cyclam = 1,4,7,11-tetraaza-cyclotetradecane) complex. Part 1. Elucidation of its luminescence lifetime's special solvent dependence; its luminescence spectra in several solvents, 23

Mercapto-substituted hypocrellin B
UV–visible and electron spin resonance study of mercapto-substituted hypocrellin B: photogeneration of semiquinone radical anion and superoxide, 105
Metachromasy bacterial lipopolysaccharide
studies on the interaction of bacterial lipopolysaccharide with cationic dyes by absorbance and fluorescence spectroscopy, 157
Monuron
transformation of monuron photosensitized by soil extracted humic substances: energy or hydrogen transfer mechanism?, 265
MV^{2+}
ion-pairing control of excited-state electron-transfer reactions. Effect of cations on cationic reactants, 9

Nanoparticles
photochemistry of ZnTPP induced by cadmium sulfide nanoparticles in 2-propanol, 187
Nanosecond laser photolysis
a comparison of the photochemistry of flavanone with that of flavone originating from their lowest excited triplet states in ethanol, 35
Naphthalenesulphonyl
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
Niphedipine
deceleration of light-induced changes of selected pharmacons by means of light screening films, 171
p-Nitro-*ortho*-toluene-sulfonate
chemical(photo-activated) coupled biological homogeneous degradation of *p*-nitro-*o*-toluene-sulfonic acid in a flow reactor, 253

Oxysanguinarine
photochemical conversion of sanguinarine to oxysanguinarine, 51

Phenols
photo-oxidation of phenol and monochlorophenols in oxygen-saturated aqueous solutions by different photosensitizers, 65
Photoacid generation
photochemistry and photoinitiator properties of novel 1-chloro-substituted thioxanthones. III: Preliminary study of the photoacid generation, 229
Photocatalytic oxidation
enhanced photocatalytic activity of $Ti_{1-x}V_xO_2$ solid solution on the degradation of acetone, 199
Photochemical behaviour
synthesis and photochemical properties of aromatic diazo-phosphonium salts, 47
Photochemical pretreatment
chemical(photo-activated) coupled biological homogeneous degradation of *p*-nitro-*o*-toluene-sulfonic acid in a flow reactor, 253
Photochemistry
photo-induced dehalogenation of α-bromoacetylarenes, 27
Photogeneration
UV–visible and electron spin resonance study of mercapto-substituted hypocrellin B: photogeneration of semiquinone radical anion and superoxide, 105
Photoisomerization
kinetic study on photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4*H*-thiopyrans, 15
Photo-oxidation
photochemical conversion of sanguinarine to oxysanguinarine, 51
the mechanism of oxidation of NADH analogues. 4. Photooxidation of *N*-acetyl-substituted 1,4-dihydropyridine in the presence of quinones, 61
photo-oxidation of phenol and monochlorophenols in oxygen-saturated aqueous solutions by different photosensitizers, 65
an investigation on ZnO photocatalysed oxidation of uracil, 215
Photophysical characterization
photophysical characterization of *trans*-4,4′-disubstituted stilbenes, 87
Photophysical properties
photophysical characterization of a 1,4,5,8-naphthalenediimide derivative, 97
Photoreduction
photoreduction of carbon dioxide catalysed by free and supported zinc and cadmium sulphide powders, 223
Photosensitizers
photo-oxidation of phenol and monochlorophenols in oxygen-saturated aqueous solutions by different photosensitizers, 65
Photosynthesis
theory of electron transfer reactions in photosynthetic bacteria reaction centers, 111
Phototransformation
transformation of monuron photosensitized by soil extracted humic substances: energy or hydrogen transfer mechanism?, 265
Photoxidation
photochemical hydroperoxidation of terpenes. I. Synthesis and characterization of α-pinene, β-pinene and limonene hydroperoxides, 75
Phthalocyanines
photo-oxidation of phenol and monochlorophenols in oxygen-saturated aqueous solutions by different photosensitizers, 65
Polyallylamine
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
Polymer conformation
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
Polystyrene latex
room temperature phosphorescence of 6-bromo-2-naphthol adsorbed on latex substrates, 249
Promethazine HCl
deceleration of light-induced changes of selected pharmacons by means of light screening films, 171

Quenching
quenching of triplet benzophenone by methyl and methoxy benzenes: are triplet exciplexes involved?, 41
Quinone
the mechanism of oxidation of NADH analogues. 4. Photooxidation of *N*-acetyl-substituted 1,4-dihydropyridine in the presence of quinones, 61
Quinoxalinobarrelene
photochemical di-π-methane rearrangement of quinoxalinobarrelenes, 57
Quinoxalinosemibullvalene
photochemical di-π-methane rearrangement of quinoxalinobarrelenes, 57

$Rb(5^2S_{1/2})$
bromine atom-abstraction reactions at elevated temperatures by ground state atomic rubidium, $Rb(5^2S_{1/2})$, investigated by time-resolved laser induced fluorescence ($Rb(5^2P_{3/2}–5^2S_{1/2})$; $\lambda = 780$ nm), 1
Reaction center
theory of electron transfer reactions in photosynthetic bacteria reaction centers, 111
RNA
in vitro photochemical damage to DNA, RNA and their bases by an inorganic sunscreen agent on exposure to UVA and UVB radiation, 205
Room temperature phosphorescence
room temperature phosphorescence of 6-bromo-2-naphthol adsorbed on latex substrates, 249

Sanguinarine alkanolamine form
photochemical conversion of sanguinarine to oxysanguinarine, 51

Semiquinone radical anion
UV–visible and electron spin resonance study of mercapto-substituted hypocrellin B: photogeneration of semiquinone radical anion and superoxide, 105
Senescent phytoplanktonic cells
rates and mechanism of light-dependent degradation of sterols in senescent cells of phytoplankton, 139
Solid state
study of bimolecular processes in ternary cyclodextrin complexes in the solid state by diffuse reflectance laser flash photolysis, 241
Solvent effect
flash photolysis studies of the *trans*-[Cr-cyclam$(CN)_2$]ClO_4 (cyclam = 1,4,7,11-tetraaza-cyclotetradecane) complex. Part 1. Elucidation of its luminescence lifetime's special solvent dependence; its luminescence spectra in several solvents, 23
Spectral properties
studies on the interaction of bacterial lipopolysaccharide with cationic dyes by absorbance and fluorescence spectroscopy, 157
Spirobenzopyran
control of the thermal reaction of a photochromic spirobenzopyran by the enzyme-like activity of albumins, 145
Stacking
naphthalenesulphonyl groups as fluorescence probes for examining the conformational behaviour of polyallylamine, 233
Sterol photodegradation
rates and mechanism of light-dependent degradation of sterols in senescent cells of phytoplankton, 139
Superoxide
UV–visible and electron spin resonance study of mercapto-substituted hypocrellin B: photogeneration of semiquinone radical anion and superoxide, 105

Ternary cyclodextrin complexes
study of bimolecular processes in ternary cyclodextrin complexes in the solid state by diffuse reflectance laser flash photolysis, 241
Terpenes
photochemical hydroperoxidation of terpenes. I. Synthesis and characterization of α-pinene, β-pinene and limonene hydroperoxides, 75
Thermal ring opening
control of the thermal reaction of a photochromic spirobenzopyran by the enzyme-like activity of albumins, 145
2*H*-Thiopyrans
kinetic study on photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4*H*-thiopyrans, 15
4*H*-Thiopyrans
kinetic study on photoisomerization of some tetrasubstituted 4-aryl-4-methyl-2,6-diphenyl-4*H*-thiopyrans, 15
Thioxanthone
photochemistry and photoinitiator properties of novel 1-chloro-substituted thioxanthones. III: Preliminary study of the photoacid generation, 229
TiO_2
in vitro photochemical damage to DNA, RNA and their bases by an inorganic sunscreen agent on exposure to UVA and UVB radiation, 205
Titanium dioxide
actinometric and spectrophotometric study of the light interaction with aqueous suspensions of various solids, 181
enhanced photocatalytic activity of $Ti_{1-x}V_xO_2$ solid solution on the degradation of acetone, 199
Trans-4,4′-disubstituted stilbenes
photophysical characterization of *trans*-4,4′-disubstituted stilbenes, 87
Triplet exciplex
quenching of triplet benzophenone by methyl and methoxy benzenes: are triplet exciplexes involved?, 41
Type II photoprocesses
rates and mechanism of light-dependent degradation of sterols in senescent cells of phytoplankton, 139

Upper triplet states
photo-induced dehalogenation of α-bromoacetylarenes, 27
Uracil
an investigation on ZnO photocatalysed oxidation of uracil, 215
UV–visible absorbance
UV–visible and electron spin resonance study of mercapto-substituted hypocrellin B: photogeneration of semiquinone radical anion and superoxide, 105
UVA
in vitro photochemical damage to DNA, RNA and their bases by an inorganic sunscreen agent on exposure to UVA and UVB radiation, 205
UVB
in vitro photochemical damage to DNA, RNA and their bases by an inorganic sunscreen agent on exposure to UVA and UVB radiation, 205
UV spectroscopy
synthesis and photochemical properties of aromatic diazo-phosphonium salts, 47

Vanadium
enhanced photocatalytic activity of $Ti_{1-x}V_xO_2$ solid solution on the degradation of acetone, 199

Zinc sulphide
photoreduction of carbon dioxide catalysed by free and supported zinc and cadmium sulphide powders, 223
Zinc tetraphenylporphyrin
photochemistry of ZnTPP induced by cadmium sulfide nanoparticles in 2-propanol, 187
ZnO
an investigation on ZnO photocatalysed oxidation of uracil, 215
